## 08 Tiger population rising in Sundarban

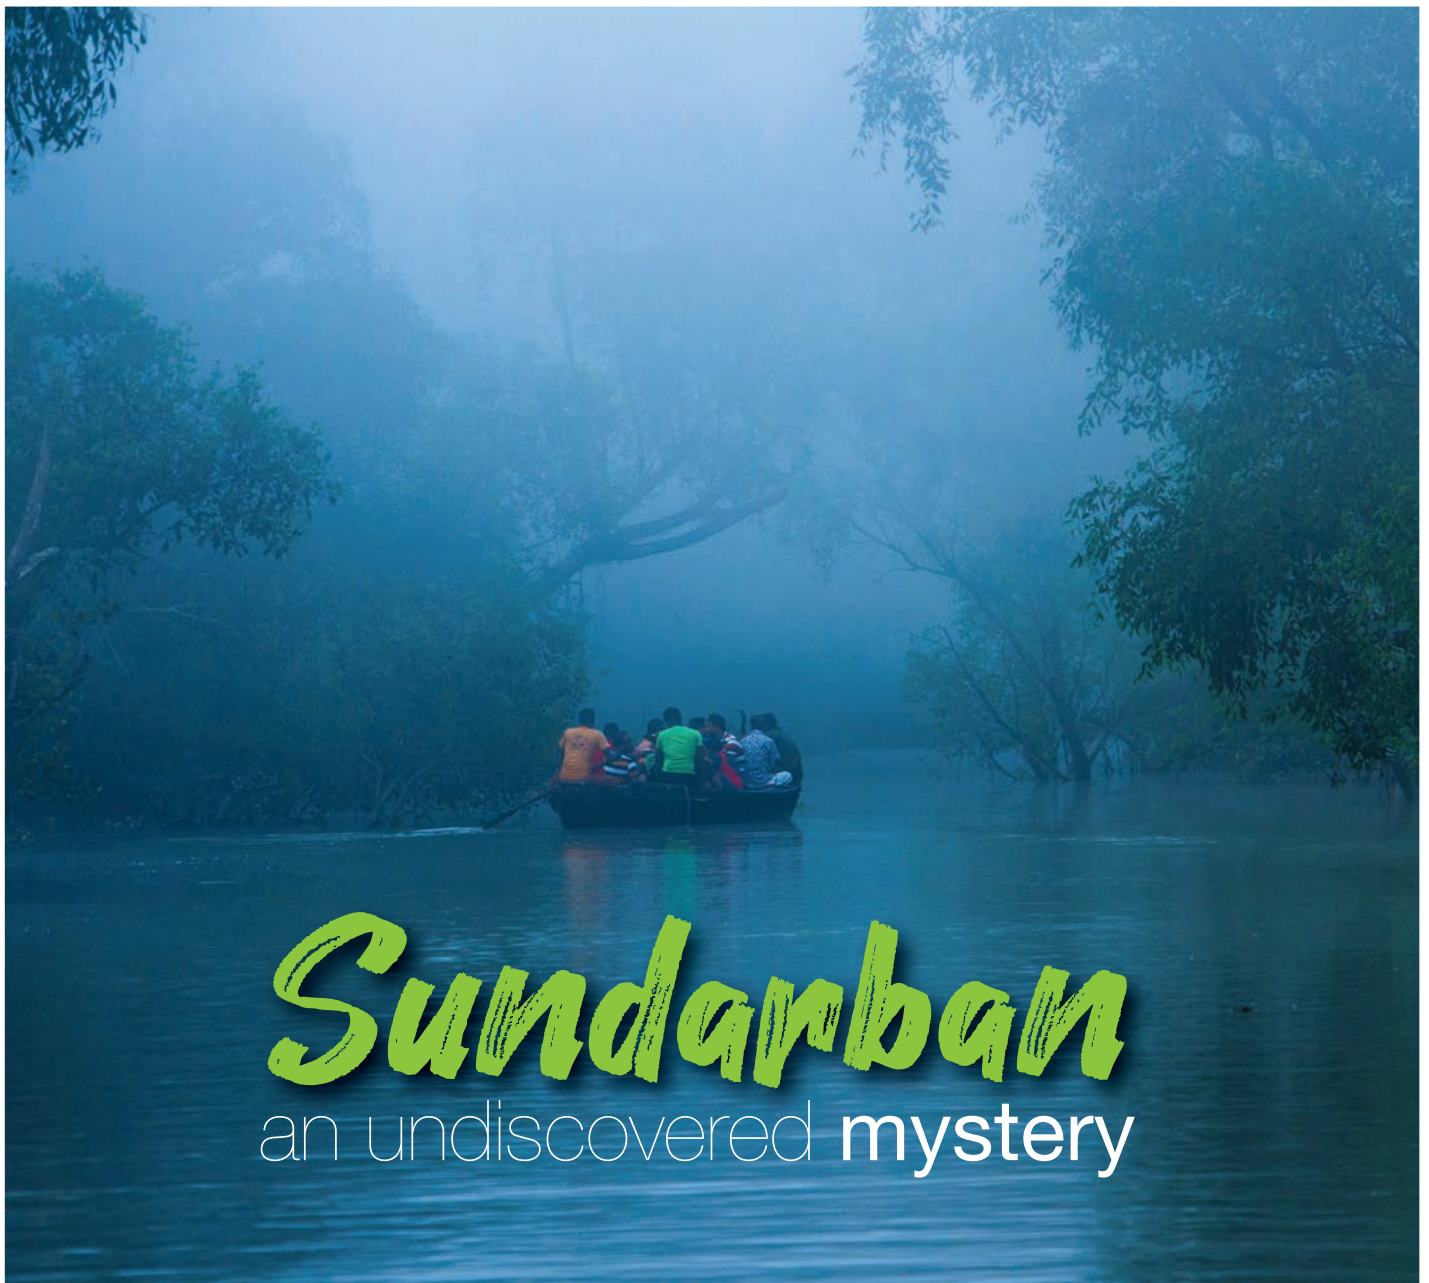

The population of Royal Bengal Tigers which declined significantly over the last decade, has started rising in parts of the Sundarban in Khulna. The population of deer, the prime food for the tigers in the region, has also increased as compared to the past.

## 12 Flora and Biodiversity of the Sundarban

A total of 245 genera and 334 plant species were recorded by David Prain in 1903. Avicenniaceae or Combretaceae, the mangroves of Bangladesh are dominated by the Malvaceae and Euphorbiaceae.

## 18 Birds of the Sundarban

The Sundarban is famous for the Bengal Tiger, not the birds. However, Sundarban is the wealthiest bird kingdom of all the forests in Bangladesh, which is also true. The Sundarban is an undisturbed sanctuary for more than 300 out of 700 birds in Bangladesh's bird list.

## 04 The Plight of Bangladesh's Historic Buildings

The country state has been intermittently open to western culture and even then mostly after its Mughal subjugation. However it has been the factors of climate and geography, more than anything else, that have conditioned the personality, art and culture, architecture, dress, tradition and way of life in this remote land.

## 06 Buddhist archaeological sites in Bangladesh

Before visiting any Buddhist monument in Bangladesh it is important to understand the history of Buddhism, its architecture and its evolution in Bengal.

## 22 Archaeological tourism in Bangladesh

Bangladesh is a country rich in archaeological attractions. This Delta Island has a long history and was ruled by the Turks, Pathans, Mughals, Portuguese, British and Pakistani rulers.
